IQMS User Letter 71 – Guidelines on Complaint entry for Cross Border E-Commerce Products in China

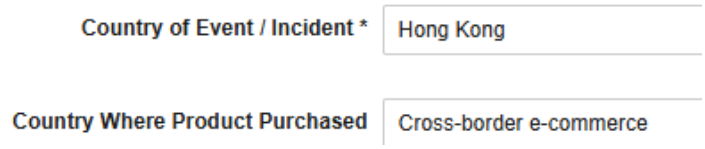

Version: 1.0
Effective Date: 2025-11-14
Applicable to: China only

Cross-border E-commerce Complaints

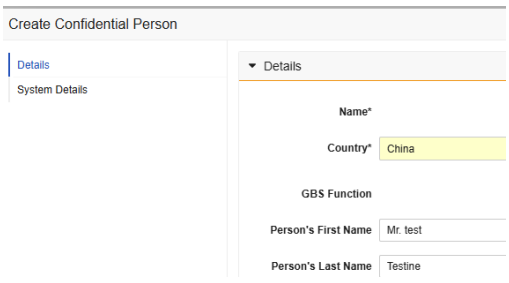

According to Global Process Guidelines, complaints have to be entered under the Country of the Incident (where the issue was detected / reported by the complainant/consumer). This user letter permits, under exceptional circumstances to follow local legal requirements, the entry of complaints in IQMS related to cross-border e-commerce in China under the country „Country of Event/ Incident" and "Country Where Product Purchased: Cross-border e-commerce."

In addition, Complaints related to products licensed for distribution via Bayer's CBEC concept managed in Hong Kong the complains can be added under the "Country of Incident" Hong Kong and "Country Where Product Purchased: Cross-border e-commerce."

The personal information of the complainant and relevant source data which include private information must be included under the country "China" in the "Confidential Person" section for complaints. This section operates independently of the complaint itself to ensure compliance with data privacy requirements.

"Cross-border eCommerce" in the context of recording customer complaints (or similar information), covers the following situations, except for suspected falsifications or counterfeits imitating licensed or authorized Bayer products:

INTERNAL

- Issues arising from private consumer-to-consumer sales, such as those on platforms like PDD (PinDuoDuo).
- Purchases made through distance sales in online pharmacies that are independent of platforms.
- Transactions conducted through independent shops on platforms, whether managed by Bayer or another entity, such as Ali TDI.
- Complaints regarding products that mislead consumers by implying a connection to Bayer through trademark usage or visual imitation of genuine Bayer products (look-alikes).
- Complaints involving diversion of products not registered, licensed, or authorized in China.
