AE & PTC Reporting and MI supported Safety Inquiry

AE & PTC Reporting

NOTE: If reporting an AE + PTC you must complete all the AE and PTC relevant fields and send the PTC report to Quality BEFORE creating and completing the AE report

Reporting of Adverse Events (Including Special Circumstances)
In line with Global PV, MI should attempt to collect the following data from “live callers” (e.g. callers on the telephone, on a live chat, video call) contacting the medical information function and document it in MIIDAS. If responses to the below are not available or unknown (i.e. if received by email) this shall be indicated in the MIIDAS AE report. No additional information is required to be collected by MI unless required by local law or regulation.

- Patient identifier
- DOB OR age of patient at onset of AE
- Patient gender
- Relevant medical history of patient (including pregnancy status), shared by the inquirer
- Product – including name, strength, formulation, dose and frequency and route of administration
- Lot/Batch number
- Expiry date of product used
- Indication that the product was prescribed for
- Start of therapy/date of last administration
- AE narrative
- Date of AE onset
- AE treatment details, if any
- If AE resulted in death or hospitalization/prolonged hospitalization (if shared)
- Country in which AE occurred
- AE reporter type
- AE reporter contact details (if allowed by local data privacy regulations)
- Consent for follow up
- Email or postal address for follow up (if allowed by local law/regulations)
- Date AE reported to Bayer
- MIIDAS identification reference
- Source documentation (including clock start date if possible, i.e. on social media messages)
- **For AEs associated with a PSP identified by MI** the Report Type "Study" must be selected and Mont Blanc PSP ID reference (where provided by the PSP responsible) added at the beginning of the AE narrative field. Patient ID should also be captured if available.

Reporting of Product Technical Complaints
In line with Global Quality, MI should attempt to collect the following data from “live callers” (e.g. callers on the telephone, on a live chat, video call) contacting the medical information function. Responses to the below should be documented in the MIIDAS PTC/Usability issue report. If responses to the below are not available or are unknown (i.e. if received by email), this shall be indicated in the MIIDAS PTC/Usability issue report. No additional information is required to be collected by MI unless required by local law or regulation.

- Product – including name, strength, formulation, pack size, dose and frequency and route of administration
- Lot/Batch/Serial number
- Expiry date

- PTC Narrative
- Confirmation if Sample/Picture available, or reason not available. If sample is available, request that sample is retained for 3 weeks in case Quality require it to be returned (Quality to request return if required). If allowed by local law.
- Number of complaint units being reported
- Sample location address (If sample address and contact details are different from reported contact details, if allowed by local data privacy regulations)
- Country of product purchase
- Country in which PTC occurred
- PTC reporter type
- PTC reporter name and contact details (if allowed by local data privacy regulations)
- Consent for follow up
- Email or postal address for follow up (if allowed by local law/regulations)
- Date PTC reported to Bayer
- Global MI System identification reference
- Source documentation

Medical Information Triage of Medical Devices and Combination Product PTCs/AEs

Please refer to the ARGUS User Letter 187 (section 1 only) and IQMS User Letter 40 for additional guidance on AE/PTC reporting for Intra-Uterine Contraceptives

- **ARGUS Safety User Manual**
- **IQMS User Letters**

Recommended disclaimer for inclusion when addressing general safety inquiries (in addition to adhering to the requirements and recommendations outlined in RD-SOP-1250/RD-SOP-1259, including the addition of a literature search strategy) :

"The following medical response may not include information from the local product label. Please read the local labelling in full to ensure that you have the complete information pertaining to your specific inquiry. The below response only complements information from the local label and must not be considered as a standalone response. Please note that any information retrieved from the literature search may differ from local label recommendations."
