1 Scope and Framework

1.1 Scope

Bayer Country Quality Units are accountable for a GMP compliant Product Technical Complaint Management within their respective countries. Within this responsibility they are supported by the respective Global Business Service in process steps like complaint initiation, classification forwarding for investigation to the RQU, and final approval including complaint sample management and reimbursement process.

This SOP defines clear guidance to the Global Business Service regarding all country specific requirements.

1.2 Framework

This SOP is based on principles and requirements outlined in SSC-PTC-SOP-001 “Manage Product Technical Complaint and Suspected Counterfeit Incidents in GBS”.

2 Abbreviations

AE	Adverse Event
AIFA	Agenzia Italiana del Farmaco (Italian Medicines Agency)
CMO	Contract Manufacturing Organization
CQH	Country Quality Head
CQU	Country Quality Unit
GBS	Global Business Service
FSE	Field Service Engineers (Radiology business)
LG	Local Guardian
OSTM/CS	Customer Service (Customer Service (including outsourced services)
OTC products	Over-the-counter products
MINSAL	Ministero Della Salute (Italian Health Authority)
PC&MI	Product Communication & Medical Information
PTC	Product Technical Complaint
PV	Pharmacovigilance
RQU	Responsible Quality Unit
LQR	Local Quality Representative

3 Purpose & Set-Up

3.1 Purpose

Country Specific Requirements for Italy are described in this SOP, regarding e.g. Data Privacy, Sample Handling Process, Reimbursement Process, Contacts, escalation rules.

During the processing of all PTCs by Bayer owned Global Business Service all country specific requirements are considered and followed besides the general complaint handling described in the SSC-PTC-SOP-001 “Manage Product Technical Complaint and Suspected Counterfeit Incidents in GBS”.

3.2 General guidance

The employees of Global Business Services follow the SOP during complaint processing in the complaint database on behalf of the Country Quality Units.

3.3 Roles and responsibilities

GBS team	- Enters PTCs, Suspected Counterfeit Incidents and Usability Issues according to defined timelines in a timely manner, entering them into the global complaint database in English language - Organizes missing information and asks CQU for any support contacting the complainant if not possible/allowed by GBS (e.g. data privacy, non-hosted language) - Performs the initial intake of complaints after receipt - Informs the CQU about all PTCs where local authorities are involved, or the complainant/sender is a law firm, about all potential counterfeits and any other cases described in this SOP - Informs the respective PV about all PTCs with a potential associated AE or LODE or potentially reportable medical device complaints, including the unique complaint database number and all relevant follow-up information - Forwards the case to the respective RQU for further assessment - Initiates the process of sample shipment if requested by RQU or specified in any other guidance document - Reviews the case for plausibility and closes the complaint case in complaint database - Sends out standard response letters (when requested) - Supports the process for reimbursement management - Forwards all cases that are not PTCs back to the CQU for further processing - In case of a complaint notified by CONDUENT in which data is missing (e.g., patient's email), contacts CONDUENT to retrieve the missing information
Country Quality Head (CQH) / Country Quality Unit (CQU)	- Is responsible for regular KPI evaluation to get overview of complaint activities at the GBS - Supports the GBS in organizing missing complaint information in case the exclusive communication channel with the complainant is by phone or else in case of incomprehensible translated messages

- Organizes the complaint sample retrieval and shipment for special cases – i.e., for controlled temperature, biohazard deliveries and radiology consumables/disposables
- Take care of response letters to complainants, sending them or having them sent by other Local functions (e.g., Legal), when requested, for cases with a final Risk Category class High or Medium, counterfeit cases, cases where the complainant/sender is a law firm or a response is required by a local Authority (e.g., AIFA, MINSAL).
- Contacts local CMO on request of GBS as RQU to get investigation reports in case the complained product is Ematonil plus emulgel. This applies also to locally supplied medical devices.
- Ensures that all changes within the country law and regulation are directly notified to the GBS and that the Country Specific SOP is updated

4 Specific requirements regarding PTC handling

4.1 Country Specific Requirements listed by different topics

Description	Assigned Roles & Document Reference
4.1.1 General Information In Italy the company operates under legal entity: Bayer S.p.A. The Headquarter is located in: Viale Certosa 130 20156 Milan (Italy)	
4.1.2 Contact list CQH Italy – Paolo Zanzi: *paolo.zanzi@bayer.com* CQH deputy – Evelina Esuperanzi: *evelina.esuperanzi@bayer.com* Italy Quality general group address *it.quality@bayer.com* **Remark:** Current name and e-mail address of CQH and CQH deputy are found on the QINT SharePoint: *https://bayergroup.sharepoint.com/sites/oneqint/SitePages/Who%20are%20we.aspx#country-quality-list*	
4.1.3 Escalation Rules The CQH and the CQH deputy should be notified via notification/immediate action in the complaint database about any complaint case referring to at least one of the following situations: - Suspected Counterfeit Cases - Any cases involving Health Authorities (e.g. AIFA, Ministero della Salute) - Cases with final risk category high or medium - Cases where the complainant/sender is a law firm **Remark:** The current names and e-mail addresses of the CQH and the CQH deputy are found on the QINT SharePoint: *https://bayergroup.sharepoint.com/sites/oneqint/SitePages/Who%20are%20we.aspx#country-quality-list*	GBS
4.1.4 Pharmacovigilance cases If a complaint case is related to any type of Adverse Event, the Pharmacovigilance department has to be informed via the following e-mail address: *pharmacovigilance.sweu@bayer.com* GBS may also receive PV cases notifications from the Global Pharmacovigilance Department (PV-Product Quality Safety Management). Such notifications are sent, as a rule, from one of the following email addresses: *PV.CaseProcessing@bayer.com*, or	GBS

Description	Assigned Roles & Document Reference
pv-pqs@bayer.com. The message usually contains a CIOMS Form or a PTC Request with all relevant case information.	
4.1.5 Product Sample Handling Samples can be substituted by suitable electronic evidence, e.g. photo, if the shipment creates additional risks (e.g. safety hazard, biohazard) or if the effort is not justified by the expected result of the investigation (e.g. sufficient information for assessment available without sample), provided that all important details are documented. In case the sample is deemed necessary by GBS or RQU, GBS starts the process by informing Bayer S.p.A. OSTM/CS and giving them full information (name of the product, pick-up address, and contact information) to organize retrieval and shipping to the local warehouse (Chiapparoli Logistica – in short CL). With the message, GBS also provides the shipping address and contact information of the manufacturing site and complaint database ID number for the case. OSTM/CS email addresses differ depending on sales channel and are available in ITA-SOP-008-S1: *https://bayer-iqms.veevavault.com/ui/#permalink=V1900000008I222* Pharmacy channel: italy.bhc.cs.farmacie@bayer.com Hospital channel: italy.bhc.cs.int.ospedali@bayer.com Wholesaler channel: Italy.bhc.cs.int.ingrosso@bayer.com If the complaint comes directly from the customer, GBS verifies whether the sample is still in their possession and whether they agree to bring it back to the pharmacy where they bought it. In the affirmative case, GBS collects the pharmacy name and its address details. The request to the customer is performed by GBS using the template provided in **Annex 2** of this document. Once the sample arrives in CL, CL takes care of the delivery to the given destination, informing GBS about the waybill number. Whenever sample retrieval is urgent (e.g. shipment to the RQU in a very short time span after complaint database data entry), retrieval and shipping activities are performed directly by GBS, using DHL courier services. **Following some exceptions cases regarding the sample handling:** • The sample requires controlled temperature conditions (2-8°C); • Contaminated sample (including suspected contaminated sample), e.g., IUS used on a patient (hazard from substances and biological hazards, e.g., BP 1429 IUS Technical Complaints Guidance document); • Radiology consumable/disposable (medical device) or spare part In the cases listed above, GBS-PTC informs CQU directly (it.quality@bayer.com) regarding the management of the sample return.	GBS

Description	Assigned Roles & Document Reference
In such cases, the shipment is requested by RQU and subject to feasibility evaluation by CQU. GBS-PTC is kept informed by CQU. BREELIB and BETACONNECT samples are always collected and sent to the respective manufacturing site directly by PHD Lifescience S.r.l (local provider/Patient Support Program). Breelib samples are sent to Vectura Delivery Devices Limited/UK every two weeks. Betaconnect samples are sent to Phillips-Medisize A/S (Struer) c/o Khalid Chajia Gimsinglundvej 20, DK-7600 Struer, Denmark **Medical device samples related to incidents:** Return of medical devices (related to incidents) to the legal manufacturer must be requested after 10 days (and not before) from the Bayer awareness date. This is due to local MINSAL regulation	
4.1.6 Statement letter **Acknowledgement Letter when a complaint comes in:** After a complaint is handed in, an immediate acknowledgement of receipt is sent out to the complainant. Usually, this notification covers the question whether a statement letter is required or not. If there is missing data in the initial complaint (e.g., missing complaint description, batch number, photos, address details for eventual retrieval of the sample), the acknowledgment letter will include the request for providing missing data. If the acknowledgment letter has to be stated in Italian, the appropriate letter template is used, as provided in Annex 2 of this document. **Response Letter - after closing the case:** Apart from exceptions mentioned below, when requested, GBS sends standard response letters to the consumer/pharmacy/hospital/wholesaler using the appropriate letter template provided in **Annex 3** of this document. For the response to PHD Lifescience S.r.l after the end of the investigation of either Breelib or Betaconnect complaint, the GBS refers to template letters provided in **Annex 4** of this document. For peculiar consumer`s requests regarding either reimbursement, or medical indications, or in case the notification turns out to be related to a parallel import, the GBS refers to template letters provided in **Annex 5**. For Radiology products related complaints, response letters are sent to the complaining hospital only when required, by using the templates provided in **Annex 3.** If the complaint is a risk class High or Medium (initial or final), or in case of the Health Authority Requests, the RQU needs to be informed about the hospital's request, so that they can prepare a response themselves. **Exceptions:** # Confirmed final risk categories high and medium (excluding Radiology products – see above)	GBS

Description	Assigned Roles & Document Reference
# Authority responses (e.g. AIFA, Ministero della Salute) # Counterfeit case responses # Cases where the complainant/sender is a law firm For the above situations, the response letters, if requested or deemed appropriate, are prepared by the CQU and/or other specific local functions can be involved in the process (e.g., Legal).	
4.1.7 RQU Contact list For CH products registration status in the respective country as well as Manufacturing Site are available via SYNAPS: go/synaps. List with the respective RQU contact names are provided by the Divisional Quality Assurance function and available on the SharePoint: PH: *PH RQU responsible list_HJ.xlsx* CH: *IQMS_MASTER LIST COMPLAINT RESPONSIBILITIES.xlsx*	GBS
4.1.8 List of Local Opportunities Products For complaint notifications regarding the following local products: **Ematonil plus emulgel** (Contracted Manufacturer: Sinerga S.p.A.) CQU plays the RQU role. GBS initiates PTC in complaint database, assigning it to LQR Country. CQU involves the relevant CMO for investigation and finally assesses the PTC. In case of radiology complaints when Bayer S.p.A. acts as a pure distributor of radiology medical devices - the legal manufacturer is an external (third party) company: - GBS enters the case in complaint database and provides a complaint database case ID to CQU. CQU contacts the local legal manufacturer requesting the investigation. When assessment is ready, CQU sends it to GBS for updating the case in communication protocol in complaint database. - A list of locally manufactured radiology medical devices for Italy can be found on GBS PTC Sharepoint: go/ptcops	
4.1.9 Data Privacy Requirements Italy and Poland are both members of the European Union, hence there are no restrictions in personal data flow, provided that the complainant is granted adequate information about the processing (transfer included) of their personal data. A Data Privacy Statement is provided to the complainant upon receipt of each notification email to *italy.quality@bayer.com*. The reply contains a link to the full data privacy statement.	

Description	Assigned Roles & Document Reference
4.1.10 Gathering additional information (including obtaining translation) The complaint notifications are sent to GBS either in Italian or English language. Since Italian is not a hosted language at GBS, when the complaint is in Italian, a translation is required, and a request is sent to Bayer Service Translation Office. Correspondence with consumers and clients (pharmacies, wholesalers, hospitals) is performed in Italian by using template letters provided in the mentioned Annexes of this document. Correspondence with Bayer employees, whatever department (e.g., OSTM/CS, PV, PC&MI, Local Guardian, business units), is performed in English. Additional information requests regarding either Breelib or Betaconnect cases are addressed to PHD Lifescience S.r.l (local provider/Patient Support Program) in English. In cases when the use of Italian communication templates provided in Annexes are not sufficient to receive necessary information from the consumer, client or other reporter, GBS Team uses Bayer AI machine translator to provide the required message in Italian. The message is sent with both translated Italian and original English text using a template with the statement attached, provided in **Annex 6** In exceptional cases, i.e., when the correspondence with consumers and clients by means of the templates or use of Bayer translator is not sufficient, or additional communication steps are required, or else a translated message is incomprehensible, GBS asks CQU for support.	GBS CQU
4.1.11 Reimbursement and Replacement Reimbursement (for pharmacies, wholesalers, hospitals) is the exclusive responsibility of OSTM/CS. GBS PTC Team informs OSTM/CS , as soon as possible, whenever a notification / request for product return / reimbursement is received directly by GBS, which allows OSTM/CS to act correspondingly. Any information update for the request about reimbursement status that might be arriving at *Italy.quality@bayer.com* is re-routed by GBS-PTC to OSTM/CS with the reference of the complaint ID.	GBS
4.1.12 Mandatory Spot Checks for Translations For all countries where the complaints are sent out for translation to the translation tool, once a year mandatory spot checks must be performed. 5% of all complaint numbers per year should by checked by native speaker (based on random selection), e.g. CQU. Important is to check the “original income text” with “translated text” provided by translation provider. The GBS is the owner of the process and start this action. The GBS leads the process, picks the cases and provides report to the CQU. The CQU checks the translation and indicates the deviations.	GBS

Description	Assigned Roles & Document Reference

Acceptance Criteria:

- No Major translation deviations
- Total number of Minor translation deviations is less than 5%.

. Deviations in the translation can be described as Minor or Major.

- Minor translation deviations are deviations where a single word or short section of a sentence has been insufficiently translated, but the essence or meaning of the original message is still captured.
- Major translation deviations are deviations where a single word or short section has been incorrectly translated (for example by the introduction of a new word or exclusion of a word from the original complaint in the translated version) which results in an incorrect essence or meaning in the translation of the original message.

In case of a major translation deviation and exceeding 5% minor cases, the GBS will be informed promptly to open a deviation in the complaint database and to ensure appropriate CAPAs.

In addition, the translation office needs to be informed.

4.1.13 Exceptions and special cases

n/a

4.1.14 Others

Radiology products peculiarities

Consumables.

Complaints related to radiology disposables/consumables are notified, as a rule, by the FSE (Bayer Field Service Engineer), Sales Representatives or directly by the client/clinic.

Injectors.

GBS only manages Risk Category High or Medium complaints/incidents related to injectors, including, in most cases, an AE (adverse event/incident).

The notifications come either from Local Field Service Engineers (FSE) or Italy Customer Support - a radiology dedicated service that receives support requests / issues notification directly from hospitals or other local health facilities.

GBS PTC Officer verifies whether a complaint/incident notification, from whatever source, has or may have an impact on patient's health / public health. In case clarification or detailed information is needed, the GBS PTC Officer retrieves it either directly from the complaining hospital (see acknowledgment letter templates in **Annex 2**) or via the relevant FSE.

Description	Assigned Roles & Document Reference

Upon data entry in complaint database, the RQU (BRD USA Pittsburgh/BRD Australia Rydalmere) sends a questionnaire either to the CQU or to the GBS PTC Officer who performed the data entry in complaint database, to request/obtain more information regarding technical aspects, description of the event, consequences for patient, etc. Such questionnaire is forwarded to the complaining hospital to be filled in (see letter template in **Annex** 2). 3 documented attempts are performed and documented. The feedback (i.e. response or no response) is entered into the Communication Protocol of the respective entry in the complaint database.

In case the legal manufacturing/UE authorized representative (BMC BV) notifies the complaint/incident to the National Health Authority MINSAL (such information is always provided to *the CQU* or to the GBS PTC Officer who performed the data entry in complaint database), GBS informs, as soon as possible, both the CQU and the local Regulatory Function.

Breelib and Betaconnect products peculiarities

For these products the complaint sender is always PHD Lifescience S.r.l.

(local provider / Patient Support Program).

For Breelib, the notification contains a Report Form attached with all information available.

For Betaconnect, the notification contains a Safe Track Report attached with all information available. The Safe Track Report Nr. is entered by GBS in the Comments field of the complaint database entry.

The batch number is not provided by PHD Lifescience

(not being available with the device). Such is either retrieved by GBS from SAP or requested from the CQU, by giving them the serial nr and the expiration date of the complained device.

IUS cases received from the distributor Alloga

In case a complaint report regarding IUS products received from the distributor Alloga:

- Alloga puts a note Alloga in the subject of the email (for recognition)

- GBS Team enters the case into complaint database, putting “Alloga” in the Person section. After the entry GBS Team sends the complaint ID to the Alloga reporter via email.

After investigation, if the response letter is to be sent to the phycian/complainant, Alloga reporter email address is put in CC.

-The reimbursement topic is handled exclusively by Alloga, no additional action of PTC Team is required.

Parallel import cases

In case a complained product turns out to be a parallel import, GBS provides a response to the complainant, by means of the appropriate letter template (see **Annex 5**).

Description	Assigned Roles & Document Reference

Cases notified by the Local Guardian

When a complaint notification comes from the Local Guardian a short feedback message with the results of the assessment (quality defect confirmed/ unconfirmed) is sent by GBS to Local Guardian.

Such cases usually refer to exceeding / missing quantities in incoming goods or to suspected counterfeit incidents.

Cases notified by Product Communication & Medical Information (PC&MI)

Notifications coming from PC&MI include a Miidas Form, with all relevant information. An autoreply message is set up in GBS SSF inbox tool to notify the PC&MI, that the case was received at GBS.

Communication with the Local Regulatory Function

In case a complainant informs about notifying or having notified the event to the National Health Authority (Ministero della Salute) and/or to the Italian Medicines Agency (AIFA), GBS informs, as soon as possible, both the CQU and Local Regulatory Function.

Quality complaints for European microstates Vatican and San Marino

For the quality complaints reported from the sovereign states of Vatican and San Marino the GBS makes the entry in complaint database in the same way as Italy cases (country chosen Italy)

Cases accidentally notified to CQU by phone

In case a PTC accidentally notified to CQU only by phone, CQU forwards it (by means of the Product Complaint Form – see **Annex 1**) to GBS PTC Team as soon as possible, and no later than 24 hours, including date of first awareness in the message subject sent to GBS. Additionally, in case the notification is deemed urgent (e.g., suspected risk category High or Medium), CQU adds “PRIORITY” in the email subject to ensure that PTC can be recognized and prioritized by GBS.

Note: For all above relevant contact email addresses are available in *https://bayer-iqms.veevavault.com/ui/#permalink=V1900000008I222*

Product Complaint Form

Complaint created (date)……
Complaint received (date) ……

Product information:	
Product name	
Batch / lot number	
Dosage form *(cream, tablet, capsule, etc.)*	
Package type/size	
Number of packages	
Sample available?*	Yes/No
*Sample available = please keep for further potential shipment	

Complaint information:	
Complaint description (defect description, is it suspected counterfeit case, etc.)	
Adverse event reported?	Yes/No
Does the complainant expect a response from Bayer?**	
**By requesting a response, the Complainant agrees to his/hers contact data being processed by Bayer for the purpose of providing the answer to the submitted complaint *(the exact sounding to be aligned with legal)*	

Complainants' contact information attention: in the countries with special Data Privacy regulations to be replaced by the complainant code number (to be given by CQU)	
Name and surname	
E-mail address	
Telephone	
Home address	

Sender (if other than Complainant, e.g. a pharmacy)	
Senders' Name (Legal entity)	
Address	
E-Mail address	
Telephone number	

Any additional information	

Annex 2

Acknowledgment letter templates in Italian.

2.1 Standard acknowledgment letter to the consumer/patient when there is no need to gather additional information.

2.1 Consumer acknowledgement.doc

2.2 Standard acknowledgment letter to the pharmacy/hospital/wholesaler when there is no need to gather additional information.

2.2 Client acknowledgement.doc

2.3 Standard acknowledgment letter to the consumer/patient when there is a need to obtain additional information (name of the product, batch number, photos of the alleged defect, further description of the defect, product availability and request to bring it back to the pharmacy for sample retrieval).

2.3 Info request to consumer.docx

An additional letter to the consumer requesting photographic evidence of all sides of the product folding box.

2.3A Request for box photos.docx

2.4 Standard acknowledgment letter to the pharmacy/hospital/wholesaler when there is need to obtain additional information (name of the product, batch number, photos of the alleged defect, further description of the defect, product availability and stating that the sample will be retrieved).

2.4 Info request to client.docx

2.5 Only applicable for RADIOLOGY products.

The acknowledgment letter to the hospital - standard acknowledgment (option A) / additional description of the complaint, sample availability, possible patient`s health issues) (option B) / sample request (option C)

Option A, no requests (only Acknowledgment):

2.5A Only acknowledgement.doc

Option B, request INFORMATION:

2.5B Info request to hospital.docx

Option C, request SAMPLE:

[ONLY FOR CONSUMABLES/DISPOSABLES with no Biological hazard and hazard from substances]:

2.5C Sample request to hospital.docx

2.6 Only applicable for RADIOLOGY products – injectors and AE involved cases.

Request to the hospital for additional information about patient`s health by means of the questionnaire.

2.6 Questionnaire to hospital RD.docx

2.7 Letter template to the physician - request for information in case of IUS LODE cases.

2.7 Info request IUS LODE cases.docx

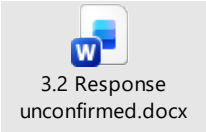

Annex 3

Response letter templates to the consumer/patient or to pharmacy/wholesaler/hospital in Italian.

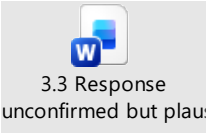

3.1 The response letter to the consumer/patient or pharmacy/wholesaler/hospital – confirmed quality defect

3.1 Response confirmed.docx

3.2 The response letter to the consumer/patient or to pharmacy/wholesaler/hospital – unconfirmed quality defect

3.3 The response letter to the consumer/patient or to pharmacy/wholesaler/hospital – unconfirmed quality defect but plausible.

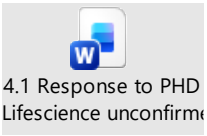

3.4 The response letter to the consumer/patient or to pharmacy/wholesaler/hospital – abbreviated workflow
